

Postgraduate Institute of Medical Education and Research, Chandigarh

Department of Hematology

Flow cytometric assay for minimal residual disease (MRD)

Name V K Gurg Age/sex 65 Yr/M CR No. 201405136462
Ward/OPD Clinical Hematology & Medical Oncology-Hematology Clinic

Requisition Date	Lab ID	Sample	Consultant	BMA No.
24/08/2023	MRD-643/23	Bone Marrow Aspirate	-	A-2295/23

TLC ($\times 10^9$ /L)	Neutrophils (%)	Lymphocytes (%)	Monocytes (%)	Eosinophils (%)	Other (%)
5.61	-	-	-	-	-

Bone Marrow Diagnosis

Multiple myeloma, received Daratumumab.

Gated events

SSC vs CD38 vs CD138 vs CD45, and CD319, CD38JK-36, 0.12% of all viable cells.

RESULT

Percentage of MRD (%) Nil
Number of events acquired 1.6 million
Cellularity of the sample Adequate
Viability of the sample (%) 91.24%

Comments

No residual clonal plasma cell are detected.
